

### Transformer 1,600kVA

Primary voltage: 690V

Input: 1 x low voltage circuit breaker 1,600A

Connections: 4 x NH3 fused busbar  
Cable entry from the side

Secondary voltage: 400V

Connections: 6 x NH3 fused busbar  
Cable entry from the side.

Details: Three-phase cast resin transformer 1,600kVA  
(Auto transformer NOT galvanic isolation)  
Switching group: Yna0  
Short-circuit voltage: 1.18%  
suitable for outdoor installation  
air-cooled  
Forklift pockets  
Designed as an 8ft container.

Dimensions/Weight:

8ft  
Length: 2,438mm  
Width: 2,220mm  
Height: 2,260mm  
Weight: 3,900kg
