

Transformer 1,000 kVA

Supply: 400 V
overvoltage

Outputs: 500 V - 690 V - 1,000 V
undervoltage

Power Falling away linearly
500 V = 500 kVA
690 V = 690 kVA
1,000 V = 1,000 kVA

Details: AC cast resin transformer in 10 ft. container
(galvanic isolation), suitable for outside use,
air-cooled
Connection options via CU track connection
at the power switch
Transformer equipped with protective devices
Supply / overvoltage protected by power switch
Output / undervoltage protected by power switch
Switching group: dYN5
Uk% at 1,000 V: 10%
frequency 50 Hz

Length: 3,050 mm
Width: 2,500 mm
Height: 2,600 mm
Weight: 3,800 kg

Extras: Transport loops for crane loading
forklift pockets isolation
monitoring may be added
