

Transformer 400kVA

Primary Voltage: 690V / 580V / 500V / 460V

Input: 1 x low voltage circuit breaker 630A

Connections: 4 x NH3 fused busbar connections
Cable entry from the side

Secondary Voltage: 400V

Connections: 6 x NH3 fused busbar connections
Cable entry from the side.

Details: Three-phase cast resin transformer 400kVA
(Auto transformer NOT galvanic isolation)
Switching group: Yna0
Short circuit voltage: 1.14%
suitable for outdoor installation
air-cooled
Forklift pockets
Designed as an 8ft container.

Dimensions/Weight:

8ft

Length: 2,438mm

Width: 2,220mm

Height: 2,260mm

Weight: 2,200kg
