

Low voltage main distributions 4,000A With touchscreen panel

- Input:** 4 x circuit breaker (generator) 3-pole, 2,500A
1 x circuit breaker (grid feed) 4-pole, 630A
- Outputs:** 10 x bus bar outlets protected by NH3 / 630A
10 x universal measuring devices with peak value display

Powerlock Panel consisting of:
6 x 3-pole circuit breaker, 400A
6 x set of Powerlock couplings 5-pole, 400A
6 x universal measuring devices with peak value

- Extras:** Touchscreen panel for controlling up to 4 generators
Error message transmission via SMS possible
Connection to GLT bar possible

- Details:** low voltage main distribution
in a 10ft. steel plate secure container.
- Synchronous operation of up to 4 generators possible
 - Uninterruptible or switching automatic between mains / generator possible
 - Cable entries on the side
 - Container have operator area inside

- Dimensions:** Length: 2,991mm
Width: 2,438mm
Height: 2,591mm
Weight: 4,500kg
